<b>Operating System:</b> All	<b>Easy fix?:</b> No
<b>Pull Request or Patch supplied:</b>	<b>Resolution:</b> fixed
<b>Crashes QGIS or corrupts data:</b>	<b>Copied to github as #:</b> 13201

#### Description

If choose Polynomial 3 type and press OK, message "Polynomial 3 requires at least 1 GCPs. Please define more" appears. But polynomial 3 requires at least 10 GCPs. If choose another menu item, for example, polynomial 1 type, then message "Polynomial 1 requires at least 6 GCPs. Please define more" appears. But polynomial 1 requires 3 GCPs. And another menu items also incorrect.

#### History

##### #1 - 2010-10-30 11:41 AM - lynxID -

The reason of this bug is wrong place of the Projective transformation in the Transformation [[ComboBox]]. I have attached a patch that will fix this bug.

##### #2 - 2010-11-02 12:29 PM - Alexander Bruy

- Resolution set to fixed

- Status changed from Open to Closed

Applied in commit:1828dd7e (SVN r14492)
