Description

In my opinion, the GPS symbols (share/gqis/svg/gpsicons) look bad. I have modified these icons to look better, and renamed them to reflect their name on a Garmin GPSr.

I've applied these in SVN commit:ba52dcf2 (SVN r5902). Note that I've haven't renamed the files - I'd need more convincing as to the benefit of that :)

Thanks for the improvements to the icons.
