QGIS Application - Bug report #3172
raster calculator does not work with RasterLite?

2010-11-01 01:16 AM - Paolo Cavallini

Status:	Closed		
Priority:	Low		
Assignee:	Marco Hugentobler		
Category:	Data Provider		
Affected QGIS version:		**Regression?:**	No
Operating System:	Debian	**Easy fix?:**	No
Pull Request or Patch supplied:		**Resolution:**	fixed
Crashes QGIS or corrupts data:		**Copied to github as #:**	13232

Description

Testing the new raster calculator, I discovered that apparently it does not work with valid [[RasterLite]] layers (or perhaps with mutiband?):

    RASTERLITE:/home/paolo/qgis-sample.sqlite,table=TrueMarble@1 * 100

is invalid.

A sample db can be downloaded from: http://www.gaia-gis.it/qgis-sample.sqlite.gz (beware, 280 Mb)

History

#1 - 2010-11-17 01:58 AM - Marco Hugentobler

- Resolution set to fixed

- Status changed from Open to Closed

The problem were the :/- characters in the layer name. Should be fixed with commit:2fd7c32a (SVN r14697)
