Easy fix?:	No	**Copied to github as #:**	13264

Description

It would be nice to be able to enforce an optional parameter in qgm as obligatory - sth like a "require=yes" atribute.

Case: r.cost supports various input types - x,y coords, vector map, raster map. According to GRASS toolbox convention, I guess it should be divided into 3 seperate ones qgms: r.cost.coord, r.cost.vect, r.cost.rast. Although in each case the respective input starting points method should be required, there is no way to specify this in a qgm currently.

#3203 is related - maybe to workaround that bug add support for sth like "require=no" BTW?

History

#1 - 2011-12-16 01:54 PM - Giovanni Manghi

- Target version changed from Version 1.7.0 to Version 1.7.4

#2 - 2011-12-23 09:22 AM - Paolo Cavallini

- Pull Request or Patch supplied set to No
