

QGIS Application - Feature request #3227

Load PostGIS layer only for current canvas extent

2010-11-18 04:55 AM - Ivan Mincik

Status:	Open	Resolution: Copied to github as #: 13287
Priority:	Low	
Assignee:		
Category:	Vectors	
Pull Request or Patch supplied:	No	
Easy fix?:	No	
Description		
<p>It would be nice to add spatial query to 'Add [[PostGIS]] Table Build query' dialog to limit loading layer features only to features intersected/contained by current map canvas extent (or possibly also extent of some other already loaded layer).</p> <p>This feature is very useful when You have huge table and You want to work only with its small part. In case of huge table it will speed up dramatically loading time and You can profit also from some other benefits.</p> <p>Currently I am doing this by using [[CopyPasta]] plugin > Map Extent SQL and placing it to 'Build query' dialog. This will limit loaded layer to my custom extent.</p> <p>Thanks a lot</p>
