Status:	Closed	
Priority:	Low	
Assignee:		
Category:	Forms	
Affected QGIS version:	master	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:	No	Resolution:
Crashes QGIS or corrupts data:	No	Copied to github as #: 13288
Description		
<p>I have tried a lot of different widgets with customs ui forms and I have found that:</p> <p>1. A column that is set as Unique value and i editable is not working with the custom ui form (I have tried with and without setting the combo box as editable)</p> <p>2. The Calendar is not working with: Date Edit, Date/Time Edit and Calendar widgets. Not only it is not working, but the widget that is usually automatically created is present in the custom form. See the attachment.</p>

The whole edit widget part has seen a major refactoring since this issue was opened. Due to low activity here I suppose this is solved.

Please re-open if this is still an issue.
