Description

The attached patch moves [copies] the reuse last values check box into the attribute dialog when creating a new feature. I moved this here as you may want to remember the values for a couple of features then turn it off, create some different features, and then turn it back on again.

Resolution:

Having it in the attribute dialog makes it a bit easier to selectively choose when you want to remember values for the next time.

Hello, bug triage...

do you still plan to integrate this feature into QGIS attribute forms or should we abandon it for something else?
