

QGIS Application - Feature request #3303

Expression builder for rule based styling.

2010-12-07 05:32 AM - Nathan Woodrow

Status:	Closed	Resolution: fixed Copied to github as #: 13363
Priority:	Low	
Assignee:	Martin Dobias	
Category:	GUI	
Pull Request or Patch supplied:		
Easy fix?:	No	
Description		
<p>It would be cool to have the some kind of expression builder next to the rule entry text box for the rule based styling. The one used for the query builder would be perfect.</p> <p>Would make it easier to write expression rather then having to remember the column names and values.</p>		

History

#1 - 2010-12-08 11:00 PM - Nathan Woodrow

Attached is a patch to add an expression builder to the new rule dialog. Uses the query string builder dialog as it already had all the functions needed.

#2 - 2010-12-09 10:30 AM - Martin Dobias

- Resolution set to fixed
- Status changed from Open to Closed

Patch applied in commit:d1438490 (SVN r14879) - thanks, Nathan! I have added your name to the list of contributors.
