Description

Hi,

ftoools, data managment, "merge shapefiles to one" works propper, when you start it once. When you do not close the window and want to merge shapes in another folder to one shapefile, QGIS crash. The pyton message is in the attachede file.
This occurs in QGIS 1.6., windows, rel. 14615
When you close the merge shapfiles popup and do then the next folder work, all is fine.

In OSGEO4W, Qgis 1.7 Trunk, the crash do not occure.
