

QGIS Application - Bug report #3321
Crash when adding vector layer data

2010-12-11 04:44 PM - casper -

Status:	Closed	
Priority:	Low	
Assignee:	casper -	
Category:	Vectors	
Affected QGIS version:		Regression?: No
Operating System:	SuSE	Easy fix?: No
Pull Request or Patch supplied:		Resolution: worksforme
Crashes QGIS or corrupts data:		Copied to github as #: 13381
Description		
<p>Hi</p> <p>I can open Quantum GIS no problem but when I click add vector layer and get a browse dialogue box it crashes when I try to find the data for the vector layer. I've attached a bug report to this ticket.</p> <p>Thanks for your help</p> <p>Cheers</p> <p>Casper</p>

I cannot replicate this. Can you help us reproducing it?

#2 - 2011-03-05 02:33 AM - Volker Fröhlich

Please always try to have all necessary debuginfo packages installed when providing a backtrace. The "??" indicate missing packages.

#3 - 2011-03-05 02:47 AM - Jürgen Fischer

- Resolution set to worksforme
- Status changed from Open to Closed

Replying to [comment:2 volter]:

 Please always try to have all necessary debuginfo packages installed when providing a backtrace. The "??" indicate missing packages.

After 3 months? Well, the backtrace is probably good enough as it points somewhere into GTK. I suppose if the problem is still reproducible at all, it disappears when switching the desktop environment.

Doesn't look like a QGIS problem to me. So I close it. Feel free to reopen, if the problem persists.
