

QGIS Application - Bug report #3328

button "selection tool" does not enable to switch the mode

2010-12-13 02:45 PM - fbeck -

Status:	Closed	
Priority:	Low	
Assignee:	nobody -	
Category:	GUI	
Affected QGIS version:		Regression?: No
Operating System:	Debian	Easy fix?: No
Pull Request or Patch supplied:		Resolution: duplicate
Crashes QGIS or corrupts data:		Copied to github as #: 13388
Description		
<p>the select button in the attribut tool bar does not allow to change the selection mode.</p> <p>Their is this little dark arrow at the lower right corner of the button suggesting I could switch to the use of another selection tool but the button remain quiet to my tentatives to activate it.</p> <p>Also I can't realise a click and drag selection.</p> <p>I hope it can be fixed easily. Thanks to all the people who are working on this marvellous project !</p>

what version/revision of qgis are you using?

#2 - 2010-12-13 02:51 PM - Alex Mandel

Last I checked, you have to click and hold on the selection button for the drop-down to show up, not click on the arrow. I agree this presents a usability issue, but I'm pretty sure it works as I've described in 1.6 and trunk.

it changed, in trunk you don't have anymore to hold the mouse button. The options show with a simple click.
