QGIS Application - Bug report #3329
Error for postgres's provider when table(statement SELECT) is outside public's schema

2010-12-13 05:36 PM - Luiz Motta

Status:	Closed			
Priority:	Low			
Assignee:	Giuseppe Sucameli			
Category:	Data Provider			
Affected QGIS version:			**Regression?:**	No
Operating System:	All		**Easy fix?:**	No
Pull Request or Patch supplied:			**Resolution:**	fixed
Crashes QGIS or corrupts data:			**Copied to github as #:**	13389

Description

When used layers outside public's schema has problem where layer is defined with statement SQL.

The problem is message of error, but, the layer is created correct.

Menssage Error:

SQL: declare oidcursor binary cursor for select regclass...

The example of layer:

dbname='postgis' host=localhost port=5432 user='postgres' key='gid' table="(select l.id AS gid, l.the_geom AS the_geom from gis.tl_20101117_101056_limite l)" (the_geom) sql=

When layer are in public's schema is OK.

... from public.tl_20101117_101056_limite l

Hi, I am the author of this plugin. I am aware of this error message. I haven't found its cause yet, but it seems to have no actual effect on the generation of the layers. I'll keep investigating and report back when I have a fix.

- Status changed from In Progress to Open

This is a postgres provider's error, not just a plugin one.

Fixed from commit:650d97b0 (SVN r14920)

#5 - 2010-12-15 03:37 PM - Ricardo Silva

Just tested it against the 'custom db query' plugin. It's working great. Thanks a lot!
