#### Description

In a composer legend the symbols and the labels should be vertically aligned, so that their centres are at the same level.

Currently they are not necessarily aligned . e.g. in the attached screenshot the labels are slightly lower than the symbols.

I have seen screenshots where they are aligned, so I'm guessing it depends on the spacing (or perhaps font) settings.

I suspect this is really a duplicate of #168, but I'm opening a new ticket since that one is so old (sorry if I should have reopened it instead).

Yes, looks like it. Thanks.

Marco, I'm not a 100% sure but I think this commit might have caused a visual regression for market symbols in legend, described in issue 4043 (#4043).
