QGIS Application - Bug report #3347
Search query should warn when a column does not exist (instead of saying 0 matching features)

2010-12-17 12:09 AM - Alister Hood

Status:	Closed		
Priority:	Low		
Assignee:	nobody -		
Category:	GUI		
Affected QGIS version:		**Regression?:**	No
Operating System:	Windows	**Easy fix?:**	No
Pull Request or Patch supplied:		**Resolution:**	fixed
Crashes QGIS or corrupts data:		**Copied to github as #:**	13407

Description

Using the attribute table's "advanced search" button (or a rule-based rendering filter):

- Type a search query using an attribute column which doesn't exist (e.g. maybe you search for DIAM=150 because you misremembered the name of a column called DIA)

- Click the "test" button

- A message box will say "found 0 matching feature(s)"

It would be better to say "Column 'OBJECTI' does not exist".

History

#1 - 2011-02-15 01:20 AM - Jürgen Fischer

- Resolution set to fixed

- Status changed from Open to Closed

patch applied in commit:1a4ff7dc (SVN r15176). Thanks Sunil.
