

QGIS Application - Bug report #3372

QGIS 1.6.0 won't run: _Z10qAllocMoreii in QtCore4.dll on Windows machine

2010-12-26 05:02 AM - mly -

Status:	Closed	
Priority:	Low	
Assignee:	nobody -	
Category:	Build/Install	
Affected QGIS version:		Regression?: No
Operating System:	Windows	Easy fix?: No
Pull Request or Patch supplied:		Resolution: duplicate
Crashes QGIS or corrupts data:		Copied to github as #: 13432
Description		
<p>I uninstalled the old versions of QGIS (v1.0?) & GRASS from a Windows Vista machine. I downloaded the QGIS Windows Standalone Installer from www.qgis.org. I installed QGIS-OSGeo4W-1.6.0-14615-Setup-2.exe as administrator. QGIS won't run, giving only the error message "The procedure entry point _Z10qAllocMoreii could not be located in the dynamic link library QtCore4.dll." I do not have a copy of QtCore4.dll in c:\windows\system32. How do I get QGIS to run?</p>
