

QGIS Application - Feature request #3385

GML: add a choice to insert a sql filter

2011-01-03 01:24 AM - aperi2007 -

<b>Status:</b>	Closed	
<b>Priority:</b>	Low	
<b>Assignee:</b>	nobody -	
<b>Category:</b>	Data Provider	
<b>Pull Request or Patch supplied:</b>		<b>Resolution:</b> wontfix
<b>Easy fix?:</b>	No	<b>Copied to github as #:</b> 13445
<b>Description</b>		
<p>The GML format is multi-layer.</p> <p>So to select a single layer (for example called roads) , gdal, has the option to insert a sql-string:</p> <p>.. -sql "select * from roads"</p> <p>This choice permit to extract from GML only the instances referred to class "roads".</p> <p>In QGIS when try to add a vector layer from a GML would be better to have the choice to insert a sql string to apply to gdal.</p> <p>Otherwise qgis is capable to use only a gml file having one only layer in it.</p>

oops ,

I don't notice it support this just now.

sorry for noise.
