

QGIS Application - Feature request #3385
GML: add a choice to insert a sql filter

2011-01-03 01:24 AM - aperi2007 -

Status:	Closed	
Priority:	Low	
Assignee:	nobody -	
Category:	Data Provider	
Pull Request or Patch supplied:		Resolution: wontfix
Easy fix?:	No	Copied to github as #: 13445
Description		
<p>The GML format is multi-layer.</p> <p>So to select a single layer (for example called roads) , gdal, has the option to insert a sql-string:</p> <p>.. -sql "select * from roads"</p> <p>This choice permit to extract from GML only the instances referred to class "roads".</p> <p>In QGIS when try to add a vector layer from a GML would be better to have the choice to insert a sql string to apply to gdal.</p> <p>Otherwise qgis is capable to use only a gml file having one only layer in it.</p>

oops ,
I don't notice it support this just now.

sorry for noise.
