Do you mean QGIS 1.6 and GDAL 1.7? What does the console say? And the syslog?

#2 - 2011-02-07 09:33 AM - Paolo Cavallini

BTW: here it work fine, also debian squeeze. How did you obtain the package?

#3 - 2011-03-02 07:03 AM - Paolo Cavallini

- Resolution set to worksforme
- Status changed from Open to Closed

I cannot reproduce it. Please try again, if possible with a clean installation, and report back, with details on the installation method and data causing the crash.
