Description

When you upload osm files in qgis with the "osm plugin", the columns that the plugin should be added, are not all the tags available. To add columns/tag, [[OsmLoadDlg]].py must edit (the file in /usr/share/qgis/python/plugins/osm) about line 55 and add the tags that interest them.

The new OpenStreetMap support coming in 2.0 does not allow editing and uploading of OSM data. The current plugin with editing support has been removed.
