

QGIS Application - Bug report #3431

fix build from pure-git clone

2011-01-22 03:56 AM - Sandro Santilli

Status: Closed	
Priority: Low	
Assignee: nobody -	
Category: Build/Install	
Affected QGIS version:	Regression?: No
Operating System: Debian	Easy fix?: No
Pull Request or Patch supplied:	Resolution: fixed
Crashes QGIS or corrupts data:	Copied to github as #: 13491
Description	
<p>When fetching qgis from github directly there's no way git-svn can obtain the svn version number. This is instead attempted by CMake.</p> <p>The attached patch uses (when source is a git repo) only the git history, w/out involving svn, and extracts the svn revision id from git commit log (metadata).</p> <p>Only works if git history didn't diverge from svn history for more than 10 commits.</p> <p>Patch is here: http://strk.keybit.net/tmp/0001-Make-it-possible-to-generate-qgissvnversion.h-from-a-patch</p>	

History

#1 - 2011-01-22 03:56 AM - Sandro Santilli

BTW, the patch is in mailbox format, good for reading by git-am.

#2 - 2011-01-22 04:47 AM - Jürgen Fischer

- Resolution set to fixed

- Status changed from Open to Closed

fixed in commit:975b0fc7 (SVN r15066). surprisingly git doesn't have a builtin sed - or I just didn't find it yet.
