

QGIS Application - Feature request #3434

new symbology line decoration with wrong orientation

2011-01-24 02:44 AM - Sandro Santilli

Status: Closed	
Priority: Low	
Assignee: Martin Dobias	
Category: Symbology	
Pull Request or Patch supplied:	Resolution: fixed
Easy fix?: No	Copied to github as #: 13494
Description	
<p>I'm showing 2 lines with new symbology and line decoration. Both lines are horizontal 2 points segments. The one above goes right-to-left. The one below goes left-to-right.</p> <p>I would expect the line decoration (kind of an arrow head) to go in the direction of the line, but this is not happening for the right-to-left one.</p> <p>Here's a snapshot: http://strk.keybit.net/tmp/qgis_new_symbology_line_decoration.png</p> <p>For reference, WKT of the two lines: 10: LINESTRING 13: LINESTRING</p> <p>This is qgis r15056</p>

History

#1 - 2011-01-24 06:56 AM - Sandro Santilli

Further debugging shows that the problem has to do with the final segment being *exactly* horizontal.

I suspect there's an equal problem with perfectly vertical lines, as per

this other snapshot:

<http://strk.keybit.net/tmp/ArrowHeadHell.png>

#2 - 2011-01-24 11:41 AM - Sandro Santilli

Found and fixed. Attached format-patch (good to apply with git-am).

Problem was for both vertical and horizontal lines. Fixed the vertical case (int vs. float) and the horizontal case (just missing).

#3 - 2011-01-24 11:55 PM - Sandro Santilli

jef suggested this much simplified version: <http://paste.debian.net/105578/>

I've tested it and works fine.

#4 - 2011-01-25 12:24 AM - Jürgen Fischer

- Resolution set to fixed

- Status changed from Open to Closed

Replying to [comment:4 strk]:

jef suggested this much simplified version: <http://paste.debian.net/105578/>
I've tested it and works fine.

Thanks. Applied in commit:895c4a40 (SVN r15077).
