

QGIS Application - Bug report #349

Buffer plugin fails

2006-10-17 10:18 PM - Gary Sherman

Status: Closed	
Priority: Low	
Assignee: Gary Sherman	
Category: C++ Plugins	
Affected QGIS version:	Regression?: No
Operating System: All	Easy fix?: No
Pull Request or Patch supplied:	Resolution: fixed
Crashes QGIS or corrupts data:	Copied to github as #: 10408
Description	
When buffering a [[PostGIS]] layer, the buffer (geoprocessing) plugin fails with: "Unable to add geometry column to the output table"	

History

#1 - 2006-11-11 09:44 AM - Gary Sherman

This fix has been tested with:

- POSTGIS="1.1.1" GEOS="2.0.1" PROJ="Rel. 4.4.9, 29 Oct 2004"
- [[PostgreSQL]] 8.1.3

Because of the change in the name of the geometry check constraint created by addgeometrycolumn (from \$2 to enforce_geotype_shape) this fix requires a recent version of [[PostGIS]]. The minimum [[PostGIS]] version that will work with this fix is unknown.

Additional testing is needed by other [[PostGIS]]/PostgreSQL version combinations.

#2 - 2006-11-11 09:45 AM - Gary Sherman

- Resolution set to fixed
- Status changed from Open to Closed

#3 - 2009-08-22 12:46 AM - Anonymous

Milestone Version 0.8 deleted
