QGIS Application - Bug report #3490
Delimited text plugin does not work in trunk

2011-02-14 09:20 PM - Alister Hood

Status:	Closed			
Priority:	Low			
Assignee:	Gary Sherman			
Category:	C++ Plugins			
Affected QGIS version:		**Regression?:**	No	
Operating System:	Windows	**Easy fix?:**	No	
Pull Request or Patch supplied:		**Resolution:**	fixed	
Crashes QGIS or corrupts data:		**Copied to github as #:**	13550	

Description

I can no longer add any delimited text file that used to work.

Ramon reported the same thing on the mailing list; I'm not sure what OS he is using.

qgis-dev-1.7.0-65 and qgis-dev-1.7.0-68 both do not work. I think the previous version I was running did, but there is no easy way to revert to it to check.

An error message like this is produced:

The layer
X:/7372-%20WCC%20Twin%20Streams%20ICMP/test.csv?delimiter=%5B,%5D&delimiterType=regexp&xField=East&yField=North is not a valid layer and can not be added to the map

Could you attach an example file? I just tested today (commit:8e0e6f4a (SVN r15174)) with a very simple csv and it worked for me.

#2 - 2011-02-15 02:15 PM - Alister Hood

For what it's worth:

gis-dev-1.7.0-68 =

If I replace delimitedtextplugin.dll with the one from QGIS 1.6 it works.

For the record, it still doesn't work for me with commit:1a4ff7dc (SVN r15176)

#4 - 2011-02-16 01:57 AM - Jürgen Fischer

- Resolution set to fixed

- Status changed from Open to Closed

No need to keep records about how long untouched things don't change. ;)

Fixed in commit:24648847 (SVN r15178).

Should be a windows only problem with Qt >4.5 (or >4.6 - which OSGeo4W skipped). QUrl now strips off the drive letter. Existing layers need to be recreated, when affected by this.
