<b>Description</b>	
<ol style="list-style-type: none"><li>1. Open polygonal vector layer and go to New Symbology window;</li><li>2. Style Manager - Fill - Add;</li><li>3. Symbol layer type: SVG fill and choose any symbol from defaults (for example, restaurant.svg);</li><li>4. Type symbol name and save it;</li><li>5. Click on created symbol and press Edit button;</li><li>6. Outline - Change - Symbol layer type: Marker line - Marker:Change - Symbol layer type: SVG Marker - choose any svg marker from defaults;</li><li>7. Save changes and restart QGIS;</li><li>8. Open Style Manager: SVG outline is changed to red circles.</li></ol>	

### History

#### #1 - 2011-02-20 08:23 AM - Martin Dobias

QGIS currently loads/saves just one level of sub-symbols. Your symbol has two levels of sub-symbols, that's why it does not work properly.

#### #2 - 2011-12-16 01:49 PM - Giovanni Manghi

- Target version changed from Version 1.7.0 to Version 1.7.4

#### #3 - 2012-04-16 06:26 AM - Paolo Cavallini

- Target version changed from Version 1.7.4 to Version 1.8.0

- Affected QGIS version set to master

- Crashes QGIS or corrupts data set to No

#### #4 - 2012-09-04 11:59 AM - Paolo Cavallini

- Target version changed from Version 1.8.0 to Version 2.0.0

#### #5 - 2014-06-28 07:38 AM - Jürgen Fischer

- Target version changed from Version 2.0.0 to Future Release - Lower Priority

#### #6 - 2015-10-09 08:07 PM - Nyal Dawson

- Subject changed from SVG outline not saves to Only one sub-level of symbols is saved
- Assignee deleted (nobody -)
- Pull Request or Patch supplied set to No

**#7 - 2015-11-20 12:21 AM - Médéric RIBREUX**

- Resolution set to fixed/implemented
- Status changed from Open to Closed
- % Done changed from 0 to 100

Hello, bug triage...

I can't reproduce it under QGIS 2.13. Everything is kept intact in the style, I can have the same style than shown into fortrac.png.

I am closing this bug.
