

**QGIS Application - Feature request #3514**  
**Right click legend>Assign Layer CRS to Project CRS**

2011-02-20 08:02 PM - cgsbob -

<b>Status:</b> Closed	
<b>Priority:</b> Low	
<b>Assignee:</b> nobody -	
<b>Category:</b> Projection Support	
<b>Pull Request or Patch supplied:</b>	<b>Resolution:</b> duplicate
<b>Easy fix?:</b> No	<b>Copied to github as #:</b> 13574
<b>Description</b>	
Because QGIS does not warp the raster when the project crs is not the same as the raster crs, I often have to set the raster crs as the project crs. So, I would like to propose using a right click on the raster (or even vector) layer and then selecting "Assign Layer CRS to Project CRS"

**#1 - 2011-03-10 03:34 PM - cgsbob -**

- Resolution set to duplicate
- Status changed from Open to Closed

I did not realize that this is a duplicate of #1688, so I'm going to close this ticket.
