

QGIS Application - Bug report #3526

Delimited text layers in 1.6.0 project don't load in trunk

2011-02-26 02:52 AM - Donkagen2 -

Status: Closed	
Priority: Low	
Assignee: nobody -	
Category: Project Loading/Saving	
Affected QGIS version:	Regression?: No
Operating System: Windows	Easy fix?: No
Pull Request or Patch supplied:	Resolution: fixed
Crashes QGIS or corrupts data:	Copied to github as #: 13586

Description

When trying to load a project, saved under 1.6.0, and containing several delimited text layers into trunk (build 1.7.0-75), a QGIS Project Read Error occurs.

When choosing the option to find the layers, the pick dialog box starts with the wrong default directory and with the wrong "files of type" string.

For a file "AA.csv", the "Files of type" string is "AA.csv?delimiter=,&delimiter Type=plain&xFiled=X&yField=Y".

The missing files can be selected and loaded via this dialog but, for projects with a large number of such layers this becomes tiresome and error prone.

History

#1 - 2011-03-16 10:47 PM - Jürgen Fischer

- Resolution set to fixed
- Status changed from Open to Closed

fixed in commit:7a9ccbb1 (SVN r15438).
