

QGIS Application - Bug report #353

qgsvectorssymbologywidget.h still contains header in old form naming convention

2006-10-19 08:12 AM - frdcn -

Status: Closed	
Priority: Low	
Assignee: Gary Sherman	
Category: Build/Install	
Affected QGIS version:	Regression?: No
Operating System: Windows	Easy fix?: No
Pull Request or Patch supplied:	Resolution: fixed
Crashes QGIS or corrupts data:	Copied to github as #: 10412
Description	
qgsvectorssymbologywidget.h has a header (line 23 and 24) "qgsvectorssymbolwidgetbase.uic.h" that does not exist, now the header name is ui_qgsvectorssymbolwidgetbase.h	

History

#1 - 2006-10-20 07:02 PM - Gavin Macaulay -

- Resolution set to fixed

- Status changed from Open to Closed

This file isn't compiled at the moment, but I've changed the offending line in preparation (commit:2eef8b2 (SVN r5983)) for when we do use this code.
