

QGIS Application - Bug report #3533

Drag-and-dropping GPX file into QGIS window doesn't show the layer

2011-02-28 09:06 AM - Maxim Dubinin

Status: Closed	
Priority: Low	
Assignee: nobody -	
Category: Data Provider	
Affected QGIS version:	Regression?: No
Operating System: Windows	Easy fix?: No
Pull Request or Patch supplied:	Resolution: worksforme
Crashes QGIS or corrupts data:	Copied to github as #: 13593

Description

I guess because the window where type of the points in GPX is selected is omitted. I think it shouldn't and drag-and-dropping gpx should first show this window.

Sample gpx attached for testing.

History

- Resolution set to worksforme
- Status changed from Open to Closed

hmm, seems like my bad

works as it should
