

## QGIS Application - Bug report #3543

### On windows dragging toolbar outside of QGIS loses it

2011-03-04 10:16 AM - marisn -

<b>Status:</b> Closed	
<b>Priority:</b> Low	
<b>Assignee:</b>	
<b>Category:</b> GUI	
<b>Affected QGIS version:</b> master	<b>Regression?:</b> No
<b>Operating System:</b> Windows	<b>Easy fix?:</b> No
<b>Pull Request or Patch supplied:</b> No	<b>Resolution:</b> fixed/implemented
<b>Crashes QGIS or corrupts data:</b> No	<b>Copied to github as #:</b> 13603
<b>Description</b>	
Steps to reproduce: <ul style="list-style-type: none"><li>- Start QGIS on Windows</li><li>- Take one of toolbars and drag it to start menu</li><li>- Hey! I wanna my toolbar back!</li></ul>	
It's possible to get toolbar halfway outside of screen without ability to access toolbar dragging part to drag it back. QGIS doesn't offer any option to "Reset toolbars" to solve this issue. As I have already few PC's in lab with lost toolbars, it's not so rare problem.

- Target version changed from Version 2.0.0 to Future Release - Lower Priority

##### #6 - 2015-11-20 04:09 AM - Médéric RIBREUX

- % Done changed from 0 to 100
- Status changed from Open to Closed
- Resolution set to fixed/implemented

Hello, bug triage...

on QGIS 2.13 master (and probably for previous versions), it is not possible to put a toolbar on the start menu or on the task bar, at least on MS Windows 7.

It is impossible to put the floating toolbar on a side of the screen without being able to reach it later.

I am closing this bug.
