### Description

Hi,

I am stuck with problem in qgisi - everytime I try to save as the changes that I have made in the table attributes (e.g rename) it crushes.

Any idea in how to solve this?

I already spent hours trying to find what is wrong... no idea!!

can re-install the whole thing again. but don't know how to change the code in the frame work and the kind of stuff

here are the problem details:

Process: QGIS r11009

Path: /Applications/QGIS.app/Contents/MacOS/QGIS

Identifier: org.qgis.qgis

Version: 1.6.0 (1.6.0-Copiapo (exported))

Code Type: X86-64 (Native)

Parent Process: launchd r118

Date/Time: 2011-03-07 02:43:47.101 +0000

OS Version: Mac OS X 10.6.6 (10J567)

Report Version: 6

Interval Since Last Report: 752751 sec

Hi,

if you are referring to "table manager" the 3rd party plugin than it is the wrong place where to reposrt the problem. There will be soon a entire site/trac dedicated to 3rd party plugins, meanwhile please report your problems in the user mailing list, the developer of the plugin will receive the message.
