Crashes QGIS or corrupts data:		Copied to github as #: 13652

Description

Sysop Ubuntu 10.04.2 32 bits

Load 1.6 project made qgis 15429 crash with segfault

Loaded : [[MapServer]] Export (package: mapserver_export)

Warning: [[QgsRasterLayer]]::setDataProvider: Data provider is invalid.

ERROR 10: Pointer 'hDS' is NULL in 'GDALGetRasterCount'.

Then i get a segfault

So checking the project xml i see i have the

Checking the project xml i see i have the

<provider></provider>

into raster files

...

<id>21313020080131153612340</id>

<datasource>/home/ubuntu/sit/mapserver/tif/213130.tif</datasource>

<layername>213130</layername>

<srs>

...

<customproperties>

<provider></provider>

....

Solved by replacing all occurences of

<provider></provider>

with

<provider>gdal</provider>

Now old 1.6 project with raster are opened with success.

Thank you

Marco Braida
