

QGIS Application - Bug report #3624

Projection selector: Don't center CRS when selected by mouse

2011-03-16 03:22 AM - Borys Jurgiel

Status:	Closed	
Priority:	Low	
Assignee:	Jürgen Fischer	
Category:	GUI	
Affected QGIS version:		Regression?: No
Operating System:	All	Easy fix?: No
Pull Request or Patch supplied:		Resolution: fixed
Crashes QGIS or corrupts data:		Copied to github as #: 13683
Description		
<p>The r15452 works great when the selection is changed programatically, but when an item is clicked by mouse, it causes desynchronization of <i>selected</i> and <i>active</i> items. The screenshot explains everything.</p> <p>I set <code>[[MustFix]]</code> to Yes, as it makes the project selector hardly usable by mouse for me. The bug occurs in KDE. Not tested in other environments.</p>
