

QGIS Application - Feature request #3647

Add the choice "near to the pointOnSurface"

2011-03-20 10:32 AM - aperi2007 -

Status: Closed	
Priority: Low	
Assignee:	
Category: Symbology	
Pull Request or Patch supplied:	Resolution: fixed/implemented
Easy fix?: No	Copied to github as #: 13706
Description	
<p>In the label-plugin there is these choices for label in advanced section: above centroid near centroid, etc...</p> <p>I guess another very useful option is "above a point on surface"</p> <p>Because for a polygon with a hole in its center the centroid is on hole. More better the geos::PointOnSurface that return a point surely over the polygon (and over the line for a linear geometry).</p>

- Pull Request or Patch supplied set to No
- Resolution set to fixed/implemented

Hello, bug triage...

in QGIS 2.13 master (and probably in previous versions), there is the labelling option (in Placement tab): "Force point inside polygon" for "Offset from centroid" and "Around centroid" Placement options. With this option, the label will always be inside of the polygon, even if the centroid is in the hole.

I am closing this feature request...

#5 - 2019-05-07 11:04 PM - Nathan Perry

I still find a need for this feature, despite the existence of "force point inside polygon". See this new feature request: <https://issues.qgis.org/issues/22012>
