

QGIS Application - Bug report #3689

New raster implementation: identify tool not working on reprojected raster

2011-03-30 01:23 AM - Tim Sutton

Status:	Closed	
Priority:	Low	
Assignee:	Redmine Admin	
Category:	Build/Install	
Affected QGIS version:		Regression?: No
Operating System:	Debian	Easy fix?: No
Pull Request or Patch supplied:		Resolution: fixed
Crashes QGIS or corrupts data:		Copied to github as #: 13748
Description		
<p>Identify does not work on the attached image when using OTFP. To replicate:</p> <ul style="list-style-type: none">- load the raster- set project projection to google mercator / 900913- enable otfp- click somewhere on the image with identify tool <p>-- No results are displayed --</p> <ul style="list-style-type: none">- set project projection to epsg:4326- click on the image with identify tool <p>-- Results are correctly displayed --</p> <p>Ideally identify should work on projected images too.</p> <p>Tim</p>
