Category:	Web Services clients/WMS			
Affected QGIS version:		**Regression?:**	No	
Operating System:	Windows	**Easy fix?:**	No	
Pull Request or Patch supplied:		**Resolution:**	worksforme	
Crashes QGIS or corrupts data:		**Copied to github as #:**	13799	

Description

I've noticed that 1.7 doesn't render wms properly. The line edges appear very jagged, 1.6 behaviour was nice, anti-aliased lines. I would say this is a serious usability bug. No problem with adding shapefiles, rendering is fine.

History

#1 - 2011-04-16 09:43 AM - Jürgen Fischer

this might be a duplicate of #3734, if so it might be fixed in commit:55588f61 (SVN r15732). Would please test again with current trunk?

If it still doesn't work, please provide a test case.
