

QGIS Application - Bug report #3761

"Cancel" button in Symbol properties dialogue has the same effect as "OK" button.

2011-04-20 04:46 AM - Alister Hood

Status: Closed	
Priority: Low	
Assignee:	
Category: GUI	
Affected QGIS version: master	Regression?: No
Operating System: Windows	Easy fix?: No
Pull Request or Patch supplied: No	Resolution: fixed/implemented
Crashes QGIS or corrupts data: No	Copied to github as #: 13820
Description	
<ol style="list-style-type: none">1. open the layer properties for a vector layer2. click the "Change" button on the left hand side of the window. This opens the Symbol properties dialogue3. change something (e.g. click the + button to add a symbol layer)4. click "Cancel"5. click the "Change" button again: you will see that the changes you made last time have been applied (e.g. the new symbol layer is still there), even though you clicked "Cancel".	
FWIW I'm running r15740

Sorry: the "Change" button I referred to is in the "style" tab, of course.

(and thanks for fixing my formatting Jef :))

#2 - 2011-04-20 08:47 AM - John Tull

Also, please note this ticket.

<https://trac.osgeo.org/qgis/ticket/3427>

In effect, the ok button causes rendering to occur again, for instance, after already hitting the apply button in the style dialog. The cancel button does not cause this re-rendering to occur, so it does have unintended functionality different from the ok button. At least that is true on my OS X system.

| "Cancel" button in Symbol properties dialogue has the effect as "OK" button

Obviously this description isn't quite right. The effect is not the same, as when you click cancel the changes are not applied in the main layer properties

layer. The problem is just that when you reopen the symbol properties dialogue it remembers what you selected previously, instead of being reset to the current layer properties.

Also see similar bug #4092 for the "Settings>Project Properties" dialogue

#5 - 2011-10-01 01:43 PM - Jürgen Fischer

- *Pull Request or Patch supplied set to No*

#6 - 2011-12-16 12:45 PM - Giovanni Manghi

- *Target version changed from Version 1.7.0 to Version 1.7.4*

#7 - 2012-04-16 06:27 AM - Paolo Cavallini

- *Target version changed from Version 1.7.4 to Version 1.8.0*

- *Crashes QGIS or corrupts data set to No*

- *Affected QGIS version set to master*

#8 - 2012-09-04 12:00 PM - Paolo Cavallini

- *Target version changed from Version 1.8.0 to Version 2.0.0*

#9 - 2014-06-28 07:38 AM - Jürgen Fischer

- *Target version changed from Version 2.0.0 to Future Release - Lower Priority*

#10 - 2015-08-21 12:03 PM - Anita Graser

- *Resolution set to fixed/implemented*

- *Status changed from Open to Closed*

With the redesign of the style dialog, I think this is not an issue anymore. Please reopen if necessary.
