QGIS Application - Feature request #3775
if column name used for symbology changed, QGIS should ask when applying a QML file

2011-04-26 04:43 AM - Giovanni Manghi

Status:	Open		
Priority:	Normal		
Assignee:			
Category:	Symbology		
Pull Request or Patch supplied:	No	**Resolution:**	
Easy fix?:	No	**Copied to github as #:**	13833

Description

Take a vector and apply some kind of styling to it, then save the QML style file.

Change the name of the column used for styling and try re-apply the QML file:

QGIS will fail to style the vector as in the QML file the column name is now wrong.

In this cases QGIS should warn the user and allow him/her to choose the column to be used to style the vector.
