QGIS Application - Bug report #3777
Attribute table record selection

2011-04-26 12:06 PM - bderstine -

Status:	Closed			
Priority:	Low			
Assignee:				
Category:	GUI			
Affected QGIS version:	master	**Regression?:**	No	
Operating System:		**Easy fix?:**	No	
Pull Request or Patch supplied:	No	**Resolution:**	end of life	
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	13835	

Description

Using Shapefile. 1.7.0 Build #15820. Not sure if GUI is the correct component for this...

1: Attribute Table upward scrolling mouse selection.

Go to last record (bottom).

In Editing Mode or Not In Editing Mode: Left-click on record # and drag up to select records...

(a) Table does not scroll above current extent.

(b) The count of # features selected in the window title bar does not update. This causes problems when trying to run calculations on (apparently) selected records that are not actually selected.

On the other hand, there are no problems when scrolling upward while selecting. This was unexpected.

2: Attribute Table selecting and scrolling with shift key.

Click to select any record.

Shift + Up Arrow or shift+page up/page down does not extend the selection. This was unexpected.

Hello, bug triage...

the two are still valids for QGIS 2.13 master but only on MS Windows for the first and both for the second point.

For the first part of the bug I think that there is a link with #3551 .

- Description updated

Number 2 is still valid for QGIS 3.x. It could be considered a feature request, but it is certainly something that a user would try, expecting it to work.
