

QGIS Application - Bug report #3804

Georeferencer deletes active raster

2011-05-07 01:40 PM - jprouty -

Status: Closed	
Priority: Low	
Assignee: mmassing -	
Category: C++ plugins/Georeferencer	
Affected QGIS version: master	Regression?: No
Operating System: Linux	Easy fix?: No
Pull Request or Patch supplied:	Resolution:
Crashes QGIS or corrupts data:	Copied to github as #: 13862
Description	
<p>If you set the output raster to overwrite the input raster (the one that is being georeferenced) but then click cancel while the georeferencer is reprojecting the file, the original file will end up getting deleted. This is most likely not desirable, as you end up losing your data.</p>

[georef] Don't allow overwriting input raster (fix #3804)

History

#1 - 2011-05-07 02:31 PM - Borys Jurgiel

I'm reassigning it to Manuel, do you still maintain the Georeferencer?

#2 - 2011-05-15 06:08 AM - mmassing -

Ok, I think selecting the same input and output file should be disallowed, as it is too easy to shoot oneself in the foot with such an option. I'll change that.

Thanks Borys for reassigning - I try to address georeferencer issues when I'm aware of them, although I don't always find the time to react as quickly as I'd like to.
