QGIS Application - Feature request #3911
WMS Provider obtained in QgsWMSSourceSelect should be passed to QgsRasterLayer

Description

Currently one WMS Provider gets invoked as part of [[QgsServerSourceSelect]] and a second is invoked in [[QgsRasterLayer]] one a WMS server is selected.

Unfortunately this means the WMS Capabilities gets downloaded twice, which is wasteful and shows up as a small delay (unexplained in the GUI) once the user selected their layers from the WMS server.

This is not a bug, therefore can slip the 0.8 release.
