Affected QGIS version:	Regression?: No
Operating System: All	Easy fix?: No
Pull Request or Patch supplied:	Resolution: fixed
Crashes QGIS or corrupts data:	Copied to github as #: 13941

Description

Small bug in file `qgsgeometryvertexindex.cpp` (revision 4502), lines 31-34: `QgsGeometryVertexIndex::operator=` must return a value.

Current incomplete version:

```
[[QgsGeometryVertexIndex]]&
[[QgsGeometryVertexIndex]]::operator=(QgsGeometryVertexIndex const& rhs)
{
    mIndex = rhs.mIndex;
}
```

Possible min. required fix:

```
[[QgsGeometryVertexIndex]]&
[[QgsGeometryVertexIndex]]::operator=(QgsGeometryVertexIndex const& rhs)
{
    mIndex = rhs.mIndex;
    return *this
}
```

But I'm not sure what copy semantic is expected here.

What about self-copying?

Usually, self-copying is forbidden, then

```
[[QgsGeometryVertexIndex]]&
[[QgsGeometryVertexIndex]]::operator=(QgsGeometryVertexIndex
const& rhs)
{
    if (&rhs != this)
    {
        mIndex = rhs.mIndex;
    }
    return *this
}
```
