Hello, bug triage...

do you still have the same problem on MS-Windows ?

I have tried to reproduce it under Debian. There seems to be a problem for txt2tags to generate PDF via Latex (pdflatex), at least on INSTALL.t2t (I've got a fatal error from pdflatex but it is perhaps a problem with my Latex installation not having the necessaries files).

You can activate PDF generation with the CMake option WITH_TXT2TAGS_PDF as ON.

So was it a problem on the CODING.tex file (which has disappeared from QGIS master) or a problem with the MS-Windows build instructions, or even a txt2tags MS-Windows installation ?

#9 - 2015-12-27 02:02 PM - Giovanni Manghi

what to do with this ticket? closing? leaving it open?

#10 - 2015-12-27 03:07 PM - Alister Hood

Ah, sorry. If we don't have someone to reproduce I guess close it.
I don't have a windows build environment at the moment and aren't likely to have one soon.
