QGIS Application - Bug report #4018
ng-labeling disfunctions for unicode columns

2011-06-24 07:08 AM - peppo -

Status:	Closed			
Priority:	Low			
Assignee:				
Category:	Symbology			
Affected QGIS version:		**Regression?:**	No	
Operating System:	windows 7	**Easy fix?:**	No	
Pull Request or Patch supplied:		**Resolution:**	invalid	
Crashes QGIS or corrupts data:		**Copied to github as #:**	14005	

Description

I have a postgis database table with a column named "Durchlässigkeit". When I add labeling on this column on the layer in QGIS nothing gets displayed.

The column name "durchlaessigkeit" works fine. The old labeling engine can handle "Durchlässigkeit".

I am unable to reproduce your problem. Please provide sample data (e.g. shapefile) and exact steps for reproducing. Thanks.

#2 - 2011-07-06 02:52 AM - peppo -

I can't reproduce it now neither. I am sorry - don't know what went wrong the other day.
Invalid ticket.

#3 - 2011-07-06 04:58 AM - Martin Dobias

- Resolution set to invalid

- Status changed from Open to Closed
