

QGIS Application - Bug report #4021

Empty composer window appear and is impossible to close

2011-06-27 05:10 AM - alicebtoklas -

Status:	Closed	
Priority:	Low	
Assignee:		
Category:		
Affected QGIS version:	master	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:	No	Resolution:
Crashes QGIS or corrupts data:	No	Copied to github as #: 14008
Description - launch QGIS and create a map; - create a layout with the composer manager; - close the composer window; - save your project and close it; - next time you open the project, an empty composer window appears and there is no way you can close it. The only way you can get rid of it is by suppressing it. Cheers, Alice
