Status:	Closed			
Priority:	Low			
Assignee:	Marco Hugentobler			
Category:				
Affected QGIS version:		**Regression?:**	No	
Operating System:		**Easy fix?:**	No	
Pull Request or Patch supplied:		**Resolution:**	duplicate	
Crashes QGIS or corrupts data:		**Copied to github as #:**	14009	

Description

- launch QGIS and create a map;

- create a layout with the composer manager;

- close the composer window;

- save your project and close it;

- next time you open the project, an empty composer window appears and there is no way you can close it. The only way you can get rid of it is by suppressing it.

Cheers,
Alice

History
