

QGIS Application - Bug report #4042

SVG fill symbology bad rendered

2011-07-01 03:55 PM - aperi2007 -

Status:	Closed	
Priority:	Normal	
Assignee:	pcavallini -	
Category:	Symbology	
Affected QGIS version:		Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:		Resolution: invalid
Crashes QGIS or corrupts data:		Copied to github as #: 14028
Description		
<p>Hi,</p> <p>I have build with inkskape some new SVG symbol useful to fill polygons with oblique lines.</p> <p>Many of them work pretty well, but somethink will fail the aligneament.</p> <p>I guess this is a bug.</p> <p>I put a little sample with an image of what happened and of the SVG symbol.</p> <p>I use qgis 1.8.0 trunk on windows.</p>		

History

#1 - 2011-07-02 05:21 AM - aperi2007 -

- File deleted (sample-svg.zip)

#2 - 2011-07-02 05:24 AM - aperi2007 -

- Resolution set to invalid

- Status changed from Open to Closed

- File sample-svg.zip added

it seem disappeared after I update qgis.

So I close the ticket re-open if the bug will be better defined.
