

QGIS Application - Bug report #4065

PostGIS connection from PGAdmin - troublesome on win7?

2011-07-09 10:15 PM - Bill Williamson

Status: Rejected	
Priority: Normal	
Assignee:	
Category: Data Provider	
Affected QGIS version:	Regression?: No
Operating System: Win7	Easy fix?: No
Pull Request or Patch supplied:	Resolution: invalid
Crashes QGIS or corrupts data:	Copied to github as #: 14050
Description	
<p>I cannot connect to a PostGIS database from QGIS 1.7 and trunk. Add Postgis Layer - New Connection - cannot find /etc/pg_service.conf</p> <p>I am new to postgis but I have given this a good go. see http://gis.stackexchange.com/questions/12004/qgis-to-local-postgis-connection-fails</p>	

History

I have got a successful connection;
but it seems putting anything in the parameter in the QGIS dialog for "service" causes a fail.
And many other dead ends.

#2 - 2011-07-09 11:25 PM - Bill Williamson

How do I close this ticket???

#3 - 2011-07-10 12:42 AM - Jürgen Fischer

- Resolution set to invalid

You put a "service" reference into that field. Obviously you need an entry in the [connection service file](#) for that.
