QGIS Application - Bug report #4065
PostGIS connection from PGAdmin - troublesome on win7?

2011-07-09 10:15 PM - Bill Williamson

Status:	Rejected			
Priority:	Normal			
Assignee:				
Category:	Data Provider			
Affected QGIS version:		**Regression?:**	No	
Operating System:	Win7	**Easy fix?:**	No	
Pull Request or Patch supplied:		**Resolution:**	invalid	
Crashes QGIS or corrupts data:		**Copied to github as #:**	14050	

Description

I cannot connect to a PostGIS database from QGIS 1.7 and trunk. Add Postgis Layer - New Connection - cannot find /etc/pg_service.conf

I am new to postgis but I have given this a good go. see

http://gis.stackexchange.com/questions/12004/qgis-to-local-postgis-connection-fails

History

I have got a successful connection;

but it seems putting anything in the parameter in the QGIS dialog for "service" causes a fail.

And many other dead ends.

How do I close this ticket???

#3 - 2011-07-10 12:42 AM - Jürgen Fischer

- Resolution set to invalid

You put a "service" reference into that field. Obviously you need an entry in the connection service file for that.
