| Description | | |
| <p>Hi,</p> <p>when visualizing a LANDSAT RGB set as GRASS group, the color tables of the bands are ignored. When opening the group members (r, g, b band) separately, they are respected.</p> <p>There seems to be a difference between (src/plugins/grass)</p> <pre>qgsgrassselect.cpp: selectedType = [[QgsGrassSelect]]::GROUP;</pre> <p>and</p> <pre>qgsgrassselect.cpp: selectedType = [[QgsGrassSelect]]::RASTER;</pre> <p>in this regard.</p> <p>Best, Markus</p> | | |
