

QGIS Application - Feature request #4093

Specify joint style for composer frames

2011-07-18 07:58 PM - Alister Hood

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:	Map Composer/Printing	
Pull Request or Patch supplied:	No	Resolution: fixed/implemented
Easy fix?:	No	Copied to github as #: 14076
Description		
Frames for objects in the composer have bevelled joints. Mitred joints are better because you can line up two objects without there being a glitch where the frames join. Ideally it would be possible to specify the joint style.
